

Colorado Springs Plumber Marks Decade of Service Below Pikes Peak

May 20, 2026

COLORADO SPRINGS, CO, May 20, 2026 – Colorado Springs plumbing service Colorado Springs Plumber, headquartered in the 80909 ZIP, today marked ten consecutive years of DORA-licensed residential plumbing service across Colorado Springs and the broader Pikes Peak corridor, with same-day appointment availability maintained across the entire 719 area code.

Founded in 2016 as a two-truck residential operation in the Stratton Meadows and Cheyenne Mountain neighborhoods, the company has scaled to a multi-vehicle fleet dispatched from a central east-side facility. Median response time inside the Colorado Springs city limits sits under ninety minutes for emergency calls and under three hours for outlying zones including Black Forest, Falcon, and Woodland Park. The dispatch desk at (719) 555-7180 operates around the clock.

Service mix over the decade has tracked the region's housing stock – burst pipe, drain cleaning, leak detection, water heater, and whole-house repiping lead call volume, with sewer line work growing alongside the aging cast-iron lateral inventory in Old Colorado City and Patty Jewett. Every job is performed by a DORA-licensed plumber carrying current state insurance, with written estimates delivered before any cut, clamp, or section work begins on the property.
